

Plum x Survey Platforms - Outbound Cadence

Email, LinkedIn, and Call sequence for partnership outreach to survey platform Product and BD leaders.

Email Sequence

Email 1 - Day 1

Cold opener. No signature - Smartlead appends at account level.

Subject: Survey response rates

Survey response rates dropped below 15% industry-wide.
Most platforms patch this with incentives, but fulfillment breaks at global scale.
Plum integrates with Qualtrics, SurveyMonkey, and Typeform today.
How is {{company}} handling respondent rewards across regions?

Email 2 - Day 4 (bump)

Subject: Re: Survey response rates

Bumping this up.
Three reasons panelists churn most often: slow payouts, no local currency, irrelevant rewards.
Plum handles all three through one REST endpoint, in 175+ countries.
Worth a 15-min look this week?

Email 3 - Day 8 (breakup)

Subject: Closing the loop

Closing this loop on my end.
If incentivized response rates land back on your roadmap, ping me.
If not, no worries.
Wish you the best with {{company}}.

LinkedIn Sequence

Runs in parallel with email. Kicks off Day 2 with a connection request.

Connection Request - Day 2

Keep under 300 characters. LinkedIn limit applies.

Hi {{first_name}}, working on rewards and payouts infrastructure for survey platforms. Would love to compare notes on global respondent incentivization.

Naitik

DM 1 - Day 3 (or 24h after they accept)

Thanks for connecting, {{first_name}}.

Quick context on why I reached out. Plum runs the rewards layer inside Qualtrics, SurveyMonkey and Typeform. Response rates and panel retention keep coming up in those conversations.

Curious how {{company}} is approaching global incentive fulfillment today?

Naitik

DM 2 - Day 7 (if no reply)

Stat to be validated by Plum Partnerships before send.

Hi {{first_name}},

One stat that usually gets attention: platforms that embed a native rewards layer typically see 18 to 25% lift in survey completion rates within the first quarter.

If that's on your radar, happy to walk through how the API call actually works. Otherwise will close the loop.

Naitik

Call Cadence

Single dial per contact on Day 7. Voicemail if no answer.

Voicemail (15 seconds)

Hi {{first_name}}, Naitik from Xoxoday Plum.

We power the rewards layer inside Qualtrics, SurveyMonkey and Typeform. Sent you an email and a LinkedIn note about a partnership angle for {{company}}.

If global response rates and panel retention are on your radar, call me back at {{phone}}. Thanks.

Live Answer - Opener (10 seconds)

Hi {{first_name}}, Naitik from Xoxoday Plum here.

Got 30 seconds? I'll tell you why I'm calling and you tell me if it's worth more time.

Live Answer - Pitch (30 seconds, after they say yes)

We run the rewards layer that Qualtrics, SurveyMonkey and Typeform use to pay survey respondents in 175+ countries and 55+ currencies.

Most platforms tell us their bottleneck isn't the survey, it's global fulfillment. PayPal plus Amazon gift cards plus local cash, taped together.

What does {{company}} do today when a panelist in Brazil or Germany finishes a survey?

Common Objections

Objection	Response
We already have rewards	What's the geographic coverage today? Most clients hit a wall outside US/UK.
Send me a deck	Will do, but 10 mins on Zoom is faster. What does Thursday look like?
Not the right person	Got it, who owns partnerships or marketplace integrations there?
Not a priority right now	Fair. When does the next roadmap planning happen? Worth being on it.

We built our own

Makes sense. How is it holding up on global payouts and tax compliance?
