

P0 Passive Pipeline

Smartlead Campaign Plan

Xoxoday | Plum (Global API) | 945 Leads | 3 Segments | 11-Day Multi-Channel Cadence

Prepared for review before Smartlead deployment

Date: April 2026 | Product: Plum Pro API | Team: ABM + SDR

Metric	Value
Total P0 Leads	945 (100% untouched — zero cadence steps completed)
Campaign 1	Plum API / Integration Warm — 372 leads (re-engagement)
Campaign 2	Passive New Deals — 480 leads (cold intro)
Campaign 3	Empuls / Loyalty / Other — 93 leads (multi-product)
Smartlead Steps	5 auto-emails per campaign (D1, D3, D6, D9, D11)
Manual Touches	6 per lead (LinkedIn visits, likes, connect, DMs, 2 phone calls)
Cadence Length	11 days
Product	Plum Pro API — global rewards infrastructure
Positioning	"Your earn engine + our burn engine" (open-loop only)

Deal Name Breakdown (from HubSpot)

Category	Count / Detail
New Deal (generic)	472 (50%) — went cold early, never saw demo
API / Integration	127 (13%) — active integration interest signals
Rewards (general)	78 (8%) — referenced rewards in deal name
Rewards API/Integration	72 (8%) — specific API/integration + rewards
Plum (general)	58 (6%) — named Plum product
Plum API/Integration	47 (5%) — Plum + API keyword

Category	Count / Detail
Empuls	21 (2%) — employee R&R product
Loyalty / Incentives / Perks	15 (2%) — mixed product signals
Other	55 (6%) — misc

Lead Profile Summary

Metric	Value
Top Titles	Founder (46), Co-Founder (32), CEO (45), Director (19), Product Manager (13)
Also Present	HR Manager (6), Head of Product (6), Head of Marketing (4), Head of Partnerships (4)
Missing Job Title	~170 leads (18%) — can still send, weaker personalization
Email Quality	100% have email, but many are generic (info@, admin@, connect@)

Campaign 1

P0 — Plum API / Integration Warm Re-engagement

372 leads | Re-engagement. These leads explored Plum/Rewards API/SSO/Integration before and went cold. Copy: "we've shipped a lot since you last looked."

11-Day Cadence Overview

Day	Channel	Step	Owner	Auto?
D1	Email	Email 1 — Re-engagement hook	ABM	Smartlead
D1	LinkedIn	Profile visit	ABM	Manual
D2	LinkedIn	Like/comment on post	ABM	Manual
D3	Email	Email 2 — What's new + proof	ABM	Smartlead

D9	Email	Email 4 — Sandbox CTA	ABM	Smartlead
D11	Email	Email 5 — Breakup	ABM	Smartlead

Smartlead Email Steps (Auto-Sent)

Step 1 — Day 0 | Re-engagement Hook

Subject A: {{first_name}}, quick update on the Plum integration you explored

Subject B: {{company_name}} + Plum — picking up where we left off

Hey {{first_name}},

I noticed {{company_name}} explored a rewards integration with Plum a while back — and I wanted to flag that we've shipped quite a bit since then.

Quick highlights:

- 10,000+ reward options across 100+ countries (gift cards, experiences, merchandise, charity, mobile top-ups)
- Perks API — a zero-cost engagement layer your users get for free
- 2-3 week go-live for API integration, full sandbox access from day one
- SOC 2 Type II + ISO 27001 + GDPR certified

If the use case is still relevant for {{company_name}}, happy to set up a quick sandbox walkthrough — 15 min, no commitment.

Worth revisiting?

{{sender_first_name}}

Xoxoday | Plum

Step 2 — Day 3 | What's New + Use Case Proof

Subject: Re: {{first_name}}, quick update on the Plum integration you explored

{{first_name}} — following up on my last note.

Since you last looked at Plum, we've onboarded wellness apps like Viwell, banking platforms like HDB Financial, and survey companies like Nielsen — all through the same API you'd be using.

The pattern we're seeing: companies that have an earn engine (points, cashback, activity rewards) but need a global burn engine. Plum slots in as the redemption layer — your platform stays the destination, we power what happens after users earn.

Happy to share a 2-min Loom showing how a company similar to {{company_name}} integrated. Want it?

{{sender_first_name}}

Step 3 — Day 6 | Competitive Differentiation

Subject: Why teams switch from Tremendous / Tango to Plum

Hey {{first_name}},

One thing we keep hearing from teams evaluating reward infrastructure: most alternatives are gift-card-only platforms limited to a single geography.

Here's how Plum compares:

- Tremendous — gift cards only, limited international catalogue
- Tango Card — primarily US-focused, narrow category mix
- Rybbon — email-based delivery, no real API-first architecture

Plum gives you gift cards + experiences + lounge access + merchandise + charity + mobile top-ups + always-on perks — all through one API, localised to 100+ countries.

If {{company_name}} is comparing options, I can put together a side-by-side tailored to your use case. Just reply.

{{sender_first_name}}

Xoxoday | Plum

Step 4 — Day 9 | Sandbox CTA

Subject: Free sandbox access for {{company_name}} — no strings

{{first_name}},

I know timing matters more than anything — so here's an open offer:

I've set aside sandbox access for {{company_name}}. You can test the full Plum API — browse the catalogue, simulate reward orders, see the webhook responses — without talking to anyone or committing to anything.

If rewards infrastructure is on your roadmap for this year, this saves your eng team a week of evaluation. If

not, no pressure at all.

Want me to send the sandbox credentials?

{{sender_first_name}}

Step 5 — Day 11 | Breakup

Subject: Closing the loop, {{first_name}}

Hey {{first_name}},

Last note from me on this thread.

If {{company_name}} ever revisits the rewards integration — whether it's for customer loyalty, survey incentives, referral rewards, or employee recognition — Plum's API is ready to plug in. 2-3 weeks to go live, 100+ countries, one integration.

I'll check back in a few months. But if something changes before then, just hit reply — I'm an easy conversation away.

Wishing you and the team a strong quarter.

{{sender_first_name}}

Xoxoday | Plum

Campaign 1 — Manual Touches (ABM/SDR)

These are NOT in Smartlead. Execute via LinkedIn (manual / Dux-Soup / HeyReach) and phone.

D1 — LinkedIn Profile Visit | Owner: ABM

Visit the prospect's LinkedIn profile via Dux-Soup or manually. Don't connect yet — just let the "viewed your profile" notification land alongside the email.

D2 — LinkedIn Like/Comment | Owner: ABM

Find a recent post. Like it. If substantive, leave a short 1-2 sentence comment relevant to their industry — not a pitch.

D4 — LinkedIn Connection Request | Owner: ABM / HeyReach

Clean connection request with NO note. Acceptance rates are higher without a pitch. If accepted, D7 DM becomes available.

D5 — SDR Call 1 | Owner: SDR

Script: "Hi {{first_name}}, this is [SDR Name] from Xoxoday. I'm following up on an email about Plum — you explored a rewards integration with us a while back. Is that still on your radar?" Voicemail: "Sent you an email about Plum's rewards API — just putting a voice to the name. Would love 15 minutes."

D7 — LinkedIn DM / InMail | Owner: ABM

"Hey {{first_name}} — sent a couple of emails about Plum's rewards API. Quick version: we power the redemption layer for apps like Viwell and HDB — 10,000+ rewards, 100+ countries, one API. Happy to share sandbox access if relevant."

D8 — SDR Call 2 | Owner: SDR

Second dial. Voicemail: "[SDR Name] again from Xoxoday. Reached out a few times via email and LinkedIn — one more try by phone. If rewards infrastructure comes back on the roadmap, I'm here. All the best."

Campaign 2

P0 — Passive New Deals (Cold Intro)

480 leads | Fresh introduction. Generic 'New Deal' entries — went cold early, likely never saw a demo.
Copy: educational, value-first, "your earn engine + our burn engine."

11-Day Cadence Overview

Day	Channel	Step	Owner	Auto?
D1	Email	Email 1 — Value hook (earn + burn)	ABM	Smartlead
D1	LinkedIn	Profile visit	ABM	Manual
D2	LinkedIn	Like/comment on post	ABM	Manual
D3	Email	Email 2 — Use-case proof point	ABM	Smartlead
D4	LinkedIn	Connection request (no note)	ABM	Manual
D5	Phone	SDR Call 1	SDR	Manual
D6	Email	Email 3 — How it works (product-led)	ABM	Smartlead
D7	LinkedIn	DM / InMail	ABM	Manual
D8	Phone	SDR Call 2 + voicemail	SDR	Manual
D9	Email	Email 4 — Sandbox CTA	ABM	Smartlead
D11	Email	Email 5 — Breakup	ABM	Smartlead

Smartlead Email Steps (Auto-Sent)

Step 1 — Day 0 | Value Hook — Earn + Burn

Subject A: {{first_name}}, quick question about rewards at {{company_name}}

Subject B: Your users earn. What do they redeem?

Hey {{first_name}},

Quick question: if {{company_name}} runs any kind of points, cashback, referral, or engagement program — what does the redemption experience look like for your users?

Most companies we speak with have built a strong earn engine but struggle with the burn side — limited reward options, single-geography catalogues, or high fulfilment overhead.

We power the rewards infrastructure for companies like Viwell, HDB Financial, and Curefit — giving their users instant access to 10,000+ reward options across 100+ countries. All through a single API integration that goes live in 2-3 weeks.

If this is relevant to what {{company_name}} is building, happy to discuss. 15 min, no commitment.

{{sender_first_name}}

Xoxoday | Plum

Step 2 — Day 3 | Use-Case Proof Point

Subject: Re: {{first_name}}, quick question about rewards at {{company_name}}

{{first_name}} — following up with something specific.

One of our clients — a wellness app — was struggling with low reward redemption rates. Users earned points but didn't convert them because the catalogue was limited to a handful of local gift cards.

After integrating Plum's API, they expanded to 10,000+ options across 100+ countries. Within 90 days, redemption rates tripled and monthly active users on the rewards page grew 40%.

The integration took under 3 weeks. They're now also using our Perks API to offer always-on discounts to users at zero cost.

Would a quick sandbox demo tailored to {{company_name}}'s use case be useful? Just reply with a time.

{{sender_first_name}}

Step 3 — Day 6 | How It Works (Product-Led)

Subject: How companies integrate a global rewards catalogue in under 3 weeks

Hey {{first_name}},

Here's what a typical Plum integration looks like:

Day 1-2: Sandbox access and API walkthrough. Full documentation, Postman collections, dedicated onboarding engineer.

Week 1: Integration build. Connect your platform to our Rewards API. Configure catalogue filters by country, category, and denomination.

Week 2-3: Testing and go-live. End-to-end sandbox testing, followed by production deployment.

Through that single integration, your users get access to gift cards, experiences, dining, merchandise, subscriptions, mobile top-ups, charity donations, and always-on perks — localised by country.

We also offer a white-labelled storefront if you prefer plug-and-play over building your own UI.

Reply if a 15-min technical walkthrough would help.

{{sender_first_name}}

Xoxoday | Plum

Step 4 — Day 9 | Direct CTA / Sandbox Offer

Subject: Free sandbox access for {{company_name}} — no commitment

{{first_name}},

Rather than another email, here's a standing offer:

I've set aside sandbox access for {{company_name}}. Your team can test the full Plum API — browse 10,000+ rewards, simulate orders, see webhook responses — without talking to anyone or signing anything.

If rewards infrastructure is on your roadmap this year, this saves your eng team a week of evaluation time. If

it's not the right time, totally fine.

Want me to send the sandbox credentials?

{{sender_first_name}}

Step 5 — Day 11 | Breakup

Subject: Last note, {{first_name}}

Hey {{first_name}},

I'll keep this short — this is my last email on this thread.

If {{company_name}} ever needs a global rewards API — whether for customer loyalty, survey incentives, referral programs, employee recognition, or anything in between — Plum integrates in 2-3 weeks and covers 100+ countries through one connection.

I'll circle back in a few months. But if something changes before then, just reply to this thread.

All the best to you and the team.

{{sender_first_name}}

Xoxoday | Plum

Campaign 2 — Manual Touches (ABM/SDR)

These are NOT in Smartlead. Execute via LinkedIn (manual / Dux-Soup / HeyReach) and phone.

D1 — LinkedIn Profile Visit | Owner: ABM

Visit the prospect's LinkedIn profile. Let the notification create a warm signal alongside the email. No connect request yet.

D2 — LinkedIn Like/Comment | Owner: ABM

Engage with a recent post. 1-2 sentence comment if substantive. No pitch.

D4 — LinkedIn Connection Request | Owner: ABM / HeyReach

Clean connection request, no message attached. Sets up D7 DM.

D5 — SDR Call 1 | Owner: SDR

Script: "Hi {{first_name}}, [SDR Name] from Xoxoday. Sent an email about Plum — we build the rewards infrastructure that companies plug into when they need a global redemption catalogue. Is that something {{company_name}} is exploring?" Voicemail: "Just putting a voice to the name. Would love 15 minutes if the timing works."

D7 — LinkedIn DM / InMail | Owner: ABM

"Hey {{first_name}} — sent a couple of emails about Plum's rewards API. Quick version: one integration gives you 10,000+ rewards in 100+ countries — gift cards, experiences, perks, and more. If {{company_name}} is exploring this, happy to share sandbox access."

D8 — SDR Call 2 | Owner: SDR

Second dial. Voicemail: "Reached out a few times — just one last try by phone. If rewards infrastructure comes on the roadmap, I'd love to help. All the best."

Campaign 3

P0 — Empuls / Loyalty / Mixed Product

93 leads | Broader Xoxoday platform angle. Mixed product signals (Empuls, loyalty, incentives, perks).
Copy: problem-first, then Plum API as the primary recommendation.

11-Day Cadence Overview

Day	Channel	Step	Owner	Auto?
D1	Email	Email 1 — Platform intro (multi-product)	ABM	Smartlead
D1	LinkedIn	Profile visit	ABM	Manual
D2	LinkedIn	Like/comment on post	ABM	Manual
D3	Email	Email 2 — Use-case alignment	ABM	Smartlead
D4	LinkedIn	Connection request (no note)	ABM	Manual
D5	Phone	SDR Call 1	SDR	Manual
D6	Email	Email 3 — Social proof across use cases	ABM	Smartlead
D7	LinkedIn	DM / InMail	ABM	Manual
D8	Phone	SDR Call 2 + voicemail	SDR	Manual
D9	Email	Email 4 — Direct CTA	ABM	Smartlead
D11	Email	Email 5 — Breakup	ABM	Smartlead

Smartlead Email Steps (Auto-Sent)

Step 1 — Day 0 | Platform Intro

Subject A: {{first_name}}, the rewards problem no one wants to build in-house

Subject B: Quick question for {{company_name}} on rewards infrastructure

Hey {{first_name}},

Whether it's employee recognition, customer loyalty, sales incentives, or survey rewards — the pattern is the same: companies build the program logic in-house but don't want to build the rewards catalogue, fulfilment, and compliance layer themselves.

That's exactly what Xoxoday powers. Our platform — Plum — gives you a single API to access 10,000+ reward options across 100+ countries: gift cards, experiences, merchandise, charity, mobile top-ups, and always-on perks.

Companies like Viwell, HDB Financial, Nielsen, and Brenntag use it for everything from wellness rewards to banking loyalty to channel incentives.

If {{company_name}} is running (or planning) any kind of rewards motion, happy to share how teams in your space are doing it. 15 min.

{{sender_first_name}}
Xoxoday

Step 2 — Day 3 | Use-Case Alignment

Subject: Re: {{first_name}}, the rewards problem no one wants to build in-house

{{first_name}} — quick follow-up.

Based on {{company_name}}'s space, here are the most common use cases we see teams solve with Plum:

- Employee R&R: Peer recognition, service awards, sales SPIFFs — with a global catalogue employees actually want to redeem from
- Customer loyalty: Open-loop redemption layer for points/cashback programs — your earn engine, our burn engine
- Survey & market research: Instant, automated incentive delivery to panelists across 100+ countries
- Channel / partner incentives: Reward distributors, agents, or partners without the gift-card procurement headache

Which of these (if any) is closest to what {{company_name}} is exploring? Happy to tailor a walkthrough to your specific use case.

{{sender_first_name}}

Step 3 — Day 6 | Social Proof Across Use Cases

Subject: How 3 very different companies use the same rewards API

Hey {{first_name}},

Three quick examples — same API, very different outcomes:

1. Wellness app (Viwell): Users earn points for healthy behaviours, redeem on Plum's catalogue. Perks API adds zero-cost discounts. Result: 3x redemption rate lift.
2. Neo bank (HDB Financial): Rewards for credit card spending and referrals. Plum handles multi-currency fulfilment with SOC 2 + ISO 27001 compliance. Result: faster go-live than building in-house.
3. Market research firm (Nielsen): Survey panelist incentives delivered instantly in 40+ countries. Replaced manual gift card procurement. Result: 60% reduction in ops overhead.

I'm guessing {{company_name}} doesn't fit exactly into any of these — but the infrastructure is the same. One integration, any use case.

Worth a look?

{{sender_first_name}}

Xoxoday | Plum

Step 4 — Day 9 | Direct CTA

Subject: 15 min to see if Plum fits {{company_name}}

{{first_name}},

I've sent a few notes and don't want to assume — so here's a direct ask:

Is rewards infrastructure something {{company_name}} is actively exploring this year? If yes, I'd love to set up a 15-min call where I can:

1. Understand your specific use case
2. Show you a sandbox tailored to it
3. Share what similar companies have done

If the timing isn't right, just say so — no hard feelings. I'll circle back later in the year.

{{sender_first_name}}

Step 5 — Day 11 | Breakup

Subject: Wrapping up, {{first_name}}

Hey {{first_name}},

Last email from me. I know inboxes are brutal.

If {{company_name}} ever needs a plug-and-play rewards layer — for employees, customers, partners, or anything in between — Xoxoday's here. One API, 10,000+ rewards, 100+ countries.

I'll check back in a quarter. Until then, wishing you and the team all the best.

{{sender_first_name}}

Xoxoday

Campaign 3 — Manual Touches (ABM/SDR)

These are NOT in Smartlead. Execute via LinkedIn (manual / Dux-Soup / HeyReach) and phone.

D1 — LinkedIn Profile Visit | Owner: ABM

Visit the prospect's LinkedIn profile. Let the notification create a warm signal alongside the email.

D2 — LinkedIn Like/Comment | Owner: ABM

Engage with a recent post. 1-2 sentence comment if substantive. No pitch.

D4 — LinkedIn Connection Request | Owner: ABM / HeyReach

Clean connection request — no note. Sets up D7 DM.

D5 — SDR Call 1 | Owner: SDR

Script: "Hi {{first_name}}, [SDR Name] from Xoxoday. Sent an email about our rewards platform — we help companies power their redemption layer for everything from employee recognition to customer loyalty. Relevant to {{company_name}} right now?" Voicemail: "Just putting a voice to the name. Would love 15 min."

D7 — LinkedIn DM / InMail | Owner: ABM

"Hey {{first_name}} — sent a couple of emails about Xoxoday's rewards API. One integration gives you 10,000+ rewards in 100+ countries — works for employee R&R, customer loyalty, survey incentives, or channel rewards. Happy to set up a sandbox if relevant."

D8 — SDR Call 2 | Owner: SDR

Second dial. Voicemail: "Last phone attempt — if rewards come back on the radar, we'd love to help. All the best."

Next Steps

1. Review all 3 campaign sequences above — flag any copy/tone changes.
2. Confirm sender inbox(es) — which Smartlead email accounts should send?
3. Set schedule — timezone, sending window (e.g. 9am-5pm EST, weekdays), max leads/day.
4. Email verification — run through NeverBounce/ZeroBounce first, or send as-is?
5. Once approved: Claude creates 3 campaigns in Smartlead via API, saves sequences, attaches inboxes, uploads leads, and launches.

Prepared by Claude | Xoxoday ABM Team | April 2026
