

Sumit LinkedIn Mutual Connects, API Campaign, Review Packet

For team review before launch. Owner: Naitik. Sender of record: Avipsa Biswal (Founder's Office). Product: Plum (Rewards API). Launch target: 22 May 2026.

1. What this campaign is

Sumit (CEO) has 378 mutual LinkedIn connections sitting across companies on our API hunting list. Avipsa reaches out to them on Sumit's behalf, leveraging the mutual connection as a warm intro layer. The campaign runs over LinkedIn DM (channel 0) and email (5 step sequence). Goal: book 20 minute Sumit-led conversations to evaluate Plum fit.

Source list: 378 leads, 230 unique companies, 371 already at "3 follow-up done" on LinkedIn per the source sheet.

2. Segmentation

We split the 378 leads into three audiences because one message cannot work across a panel firm CEO, a loyalty platform exec, and a partnerships lead at a SaaS company.

Segment	Leads	Hook	Core proof
1. Panel and market research	80	Respondent payouts across markets	Nielsen, Kantar
2. Platforms and C-suite	210	"Earn engine plus burn engine"	Freshworks, Xero
3. Partnerships, BD, creative	88	Partner spiff and campaign incentive infra	Freshworks

Files:

```
segment1_panel_research.csv
segment2_platforms_csuite.csv
segment3_partnership_creative.csv
```

3. Campaign names (Smartlead and HeyReach)

```
P0_API_CUSTOM-PANEL_UKEU-US_LI-EMAIL_avipsa_22MAY26
P0_API_CUSTOM-PLATFORM_IND-UKEU-US_LI-EMAIL_avipsa_22MAY26
P0_API_CUSTOM-PARTNER_IND-UKEU-US_LI-EMAIL_avipsa_22MAY26
```

Format: PRIORITY_TEAM_USECASE_REGION_CHANNEL_POC_STARTDATE.

P0 because CEO-led push. API team. LinkedIn fires first (DM), email follows. Avipsa as POC. 22 May 2026 start.

4. Proof points (all sourced from xoxoday.com case studies and the Plum bible)

Used in	Customer	Number
Segment 1 E3	Nielsen	700+ respondent rewards in 45 days, 100% API uptime
Segment 1 E3	Kantar	\$3M of survey rewards in one quarter
Segment 2 E3	Freshworks	500+ gift vouchers automated, 3X lead-to-demo lift
Segment 2 E3	Xero	25% uptick on referral conversion
Segment 3 E3	Freshworks	Same as above
All segments	Plum reach	175 countries

5. Format rules followed

These rules come from Xoxoday's outbound playbook and are not optional.

- Subject line under 5 words.
- Email body: 4 sentences max, each under 15 words, each on its own line.
- No em-dashes or en-dashes anywhere.
- No "Best, Avipsa" sign-offs in the body. Smartlead auto-appends signature at the account level.
- No "Hope you're doing well" or similar filler.
- First touch carries an insight or a question, not a product pitch.
- Numbers in the copy are real and traceable to xoxoday.com.

If a reviewer suggests a change, please keep these rules intact.

6. Segment 1: Panel and market research (80 leads)

Top accounts: Dynata, Toluna, Cint, CINT, Nielsen prospects, Kantar, Ipsos, Censuwide, Elicit Research, InnovateMR, Insightrix, Advanis, Roy Morgan.

LinkedIn DM (Day -2, from Avipsa's profile)

Hi {{first_name}}, Sumit asked me to drop you a quick note since you're both connected here. I run his founder's office at Xoxoday. Open to a 20 min chat with him on respondent payouts and global rewards infra?

Email 1 (Day 0)

Subject: On Sumit's behalf

Hi {{first_name}},

Sumit Khandelwal asked me to write, you two are connected on LinkedIn.

I run his founder's office at Xoxoday.

Curious how `{{company_name}}` handles respondent payouts across markets today.

Worth 20 min with Sumit if it's a live problem?

Email 2 (Day 3)

Subject: Respondent payouts question

Hi `{{first_name}}`,

Most panel firms lose margin on FX and cross-border payout fees.

Local bank rails in LATAM and SEA still take days, not minutes.

Xoxoday's Plum API pushes rewards to 175 countries, one call.

Worth Sumit walking you through how Nielsen runs it?

Email 3 (Day 6)

Subject: How Nielsen automated this

Hi `{{first_name}}`,

Nielsen distributed 700+ respondent rewards in 45 days via Plum.

Their API ran at 100% uptime through the program.

Kantar moved \$3M of survey rewards through us in one quarter.

Worth 20 min to see the setup?

Email 4 (Day 9)

Subject: 30 day POC offer

Hi `{{first_name}}`,

We run free 30 day POCs for research firms exploring the switch.

You pick one panel cohort, we wire up the API, done.

No procurement loop, no commit, real respondent payouts at the end.

Want me to share the POC brief?

Email 5 (Day 11)

Subject: Closing the loop

Hi `{{first_name}}`,

Last note from my side, I won't keep nudging.

If respondent payouts are not a priority this quarter, totally fine.

If they are, Sumit holds 20 min for you next week.

Door stays open either way.

7. Segment 2: Platforms and C-suite (210 leads)

Top accounts: Aon, Collinson, Bolt, Reward Gateway, InnovateMR, Splitit, Talkable, Ascenda, Fringe, Loyalty Juggernaut, Nectar, 2C2P, Mistplay, ShopBack, Growave, LoyaltyLion, Open Loyalty.

Caveat: Loyalty platforms (Reward Gateway, LoyaltyLion, Ascenda, Loyalty Juggernaut, Open Loyalty, Growave, Nectar, Talkable) are partial competitors. The copy below positions Plum as their fulfillment

partner (earn vs burn engine), which is the kit's official framing. If anyone on the team wants a separate sub-segment for these accounts with sharper partnership language, flag it before launch.

LinkedIn DM (Day -2)

Hi {{first_name}}, Sumit asked me to message you since you're both connected here. He runs Xoxoday, wanted to compare notes peer to peer on rewards infra at {{company_name}}. Open to 20 min with him next week?

Email 1 (Day 0)

Subject: Peer note via Sumit

Hi {{first_name}},

Sumit Khandelwal asked me to write, you two are connected on LinkedIn.

He runs Xoxoday, wanted to compare notes on {{company_name}}'s rewards stack.

Not a pitch, just a peer conversation.

Open to 20 min with him next week?

Email 2 (Day 3)

Subject: Earn vs burn engine

Hi {{first_name}},

Tools that nail the US often crack open on global fulfillment.

Manual gift card procurement also burns time and budget.

Plum runs rewards across 175 countries with one API.

Want Sumit to walk through how this slots into your stack?

Email 3 (Day 6)

Subject: What Freshworks did

Hi {{first_name}},

Freshworks plugged Plum into their ABM and referral stack.

500+ gift vouchers automated, 3X lift on lead-to-demo conversion.

Xero saw a 25% uptick on referral conversion the same year.

Worth 20 min with Sumit to see the wiring?

Email 4 (Day 9)

Subject: Free wiring sprint

Hi {{first_name}},

We run a 2 week wiring sprint for platform teams evaluating Plum.

Your engineers, our solution architect, one campaign live at the end.

No procurement, no commitment, just a working integration.

Want the sprint brief?

Email 5 (Day 11)

Subject: One last note

Hi {{first_name}},

Last message from me, then I'll stop.

If rewards infra is not a 2026 priority, no worries.

If it is, Sumit holds 20 min for you anytime.

Either way, glad you're in his network.

8. Segment 3: Partnerships, BD, creative (88 leads)

Top accounts: Alshaya Group, Vanguard, UnionDigital Bank, GXBank, Discuss, Axis My India, INNOFACT AG, Benefex, TrueLoyal, Skillz, plus partnership and creative roles across the broader list.

LinkedIn DM (Day -2)

Hi {{first_name}}, Sumit asked me to message you since you're connected on LinkedIn. I run his founder's office at Xoxoday, we power rewards behind ABM and partner programs. Open to 20 min with him if it's relevant?

Email 1 (Day 0)

Subject: Sumit pointed me here

Hi {{first_name}},

Sumit Khandelwal asked me to write, you two are connected on LinkedIn.

I run his founder's office at Xoxoday.

Wanted to compare notes on how {{company_name}} runs partner or campaign incentives.

Worth 20 min with Sumit if any of this is live?

Email 2 (Day 3)

Subject: Partner spiff question

Hi {{first_name}},

Most spiff and incentive programs leak budget on gift card procurement.

Manual fulfillment also slows partner activation by weeks.

Plum automates global gift card payouts via one API, 175 countries.

Want Sumit to share how Freshworks runs this for ABM?

Email 3 (Day 6)

Subject: How Freshworks ran it

Hi {{first_name}},

Freshworks moved partner and ABM rewards onto Plum last year.

500+ gift vouchers automated, no manual procurement loop.

3X higher lead-to-demo conversion across the campaigns.

Worth 20 min with Sumit to see the playbook?

Email 4 (Day 9)

Subject: 30 day pilot

Hi {{first_name}},

We run free 30 day pilots for partner and marketing teams.

You pick one campaign, we plug in the rewards layer, done.

Live payouts to real partners or prospects at the end.

Want the pilot brief?

Email 5 (Day 11)

Subject: Last note from me

Hi {{first_name}},

Final message, then your inbox is safe.

If partner or campaign incentives are not a focus, totally fine.

If they are, Sumit holds 20 min open for you next week.

Either way, glad you're in his network.

9. Open decisions for the team

- **Start date.** Currently 22 May 2026. Confirm or move.
- **Loyalty platform sub-segment.** Roughly 30 leads inside Segment 2 are loyalty platforms. Split them out with sharper partnership language, or keep as is.
- **Pilot and POC offers in Email 4.** Free 30 day POCs and 2 week wiring sprints are framed as real offers. If they are not actually on the table for these accounts, soften Email 4 across all three segments.
- **Avipsa's voice.** Anywhere a sentence does not sound like her, flag the line and Naitik will rewrite within the format rules.
- **Sender accounts.** Avipsa's primary inbox plus one warm secondary, or split senders by region.

10. What ships after sign-off

- Smartlead campaigns created paused, one per segment, with the segmented CSVs uploaded.
- HeyReach lists created, one per segment, with prospect LinkedIn URLs.
- HubSpot-ready export with campaign tracking fields.

Nothing goes live until Naitik flips the campaigns from paused to active.
