

Sumit Founder-Led Postcards (Add-on to Sumit LI Mutual Connects Campaign)

Premium physical touch from Sumit personally to top accounts inside his LinkedIn mutual list. **This is not a sales touch.** No pitch, no product mention, no proof points. Just a real card from one connection to another, acknowledging that they have been LinkedIn-connected for a while and have never actually spoken.

Cadence: postcard lands Day -3, Avipsa's LinkedIn DM Day -2, Email 1 Day 0, then the rest of the sequence carries the sales conversation.

1. Layout spec (matches the Flipkart CHRO Confex postcard style)

Card size: 6 x 4 inches (standard postcard) or A6.

Font: handwritten, **Caveat**, **Patrick Hand**, or **Kalam** from Google Fonts. Same casual feel as the Flipkart example.

Accent band: warm orange behind the signature block, same as the example.

2. Copy (one card, all 378 leads)

The copy is identical across panel, platform, and partner segments. The whole point is relational, not pitched, so segment-specific lines would dilute the feel.

Primary copy (recommended)

Top: `{{company_name}}`

Message:

Hi {{first_name}}, we have been connected on LinkedIn for a while but never actually spoken.

Figured a real note beats another DM.

Would love a proper chat whenever it suits.

Signature: **Best, Sumit / Founder @ XOXODAY**

Alternate copy (if you want a slightly warmer variant)

Top: {{company_name}}

Message:

Hi {{first_name}}, we have been LinkedIn-connected a while now.

Long overdue an actual conversation.

Let me know if you have a window sometime.

Signature: **Best, Sumit / Founder @ XOXODAY**

Both versions:

- Reference the existing connection without making it transactional.
- No product mention, no proof points, no formal CTA.
- Three short handwritten lines, the format that fits on a 6x4 card.
- Sound like Sumit, not a sales rep writing on his behalf.

3. Assets needed before print

Asset	Format	Status
Sumit's headshot	Square PNG, 500x500 px, professional	NEEDED
Xoxoday logo	SVG or transparent PNG	NEEDED
Prospect company logos	One per account, 200x200 px	NEEDED
QR code target URL	Sumit's LinkedIn profile (recommended) or Calendly	NEEDED
Handwritten font	Caveat, Google Fonts, free	Ready
Orange accent color	Suggest #F5A742 to match example	Ready

QR target recommendation. For a relational card, Sumit's **LinkedIn profile** is the most natural target. The card says "we are connected, let's talk" and the QR makes that one tap easy. A Calendly link feels too transactional for this touch.

Logo sourcing. Clearbit Logo API (<https://logo.clearbit.com/{domain}>) covers most of the 378 companies automatically. For the top 50 priority list, manual sourcing keeps print quality higher.

4. Production options

Option	Cost per piece	Speed	Notes
Reachdesk or SendOso	\$4 to \$8 incl. postage	2 to 5 days	Personalized, address-aware. Integrates with HubSpot.
Local printer + manual mail	\$1 to \$2 + postage	Slow	Cheapest, admin-heavy.
Digital postcard only (image attached to Email 1)	\$0	Instant	Skips physical, lower wow factor.

Recommendation: send physical postcards to a top 50 to 75 C-suite cut, embed the digital postcard image in Email 1 for the rest.

5. Top 50 recipient cut

Pull from all three segment CSVs, filter to:

- Job title contains: CEO, Founder, CTO, COO, CRO, CMO, CPO, Chief, President, EVP, SVP
- Status: not "4 InMail Sent" (already moved deeper)
- Priority weighting: Segment 1 panel firms first (highest API fit), then Segment 2 platforms.

Once Naitik confirms the cut, I can generate `postcard_top50.csv` with mailing-address columns reserved. Office addresses are not in the source data, so an Apollo or Clay enrichment pass is needed.

6. Cadence with postcard added

Day	Touch	Channel	Sender
-3	Postcard arrives	Physical mail	Sumit
-2	LinkedIn DM	LinkedIn	Avipsa
0	Email 1	Email	Avipsa
3	Email 2	Email	Avipsa
6	Email 3	Email	Avipsa
9	Email 4	Email	Avipsa
11	Email 5 (breakup)	Email	Avipsa

The postcard primes warmth at the relationship level. The email sequence (already locked in REVIEW.pdf) carries the actual sales conversation.

7. Open decisions

- **Primary vs alternate copy.** Pick one of the two variants above.
- **QR target.** Sumit's LinkedIn (recommended) or his Calendly.
- **Top 50 cut.** Confirm the title and segment-weighting criteria above.
- **Address enrichment.** Approve an Apollo or Clay pass for office addresses (extra credit cost).
- **Print partner.** Reachdesk, SendOso, or local printer.
